Printer Alignment Test Page for Very
5266/5066/5166/5366/5666/5766/5866/5966/6466/8066/8366/8478

Print Area

Big.first.name is designed to use the full printing area of your badges.

Use this test page to test your printer settings and alignment.

Print Area

We suggest testing first with plain paper and then with your badge stock.

Print Area

The outer corner squares should be being printed exactly in the corners
of your paper. If they are not printing exactly in the corners then
everything else will also be out of alignment.

Print Area

The lines around each badge show exactly where Big.first.name has
calculated where the badge edges should be. Therefore the grey Print
Area should be being printed fully inside each badge.

The print area padding can be changed in Settings.

Print Area

If you are having trouble printing this test page correctly please see the
Big.first.name FAQ.
